 * @professor Dr.S
 * @author Ziad Sakr
 * @author Aadiv Sheth
 */

/**
 * File: Division of Labour
 * A description of the division of labour
 */
```

We work on smaller bits by ourselves - Aadiv figured out the structure and implementation of the Process class, and Ziad figured out which data structures we were going to use, and how we were going to implement the simulation. Then we came together on Saturday and spent a few hours on Zoom and finished the simulation. After testing, Aadiv did the troubleshooting, and Ziad did the documentation.
